**Re: 2012 Dover Greenmeadow Reconstruction
ECWA Required Resolution for additional Hydrants**

Honorable Board Members,

For the Dover Greenmeadow Project, we have added 3 additional hydrants over what was previously along the street. This was done to bring the new construction up to required code (10 States Standards requires hydrants at all intersections and a certain spacing between them). The water along Dover and Greenmeadow is in a lease manage area with Erie County Water Authority (ECWA) and the Town currently pays the Erie County Water Authority a fee of \$160.80 per hydrant for exercising the valves on these hydrants as necessary for their proper maintenance and use. The ECWA requires that when hydrants are added in one of these areas that the Town Board acknowledges their addition through the approval of a resolution. Please consider and approve the resolution below:

“The Town Board of the Town of West Seneca acknowledges the additional of 3 additional hydrants along Dover and Greenmeadow with the implementation of the Towns 2012 road reconstruction project. Further the town acknowledges and resolves to pay for the additional Hydrant Fee that will be charged by the Erie County Water Authority in the amount of \$160.80 per hydrant”

Very truly yours,

Steven R. Tanner, P.E.
Town Engineer
