RE: 980 East & West Rd Demolition

As you are aware we had previously bid the demolition of the house located at 980 East & West Rd. Upon completion of the required asbestos survey by certified asbestos contractor, it has been determined there is asbestos throughout the building. The cost of demolition drastically increased because of this. As a result of these findings, and at the recommendation of Town Attorney, the Town of West Seneca secured (3) new proposals for demolition with asbestos.

I am recommending the contract be canceled with Pagano Excavating and awarded to Hannah Demolition as they were the lowest bidder in the amount of 16,000.00. In addition, they can start immediately. I have the copy of the asbestos report on file for reference. Please contact me with questions.

Regards
Jeffrey Schieber
Town of West Seneca
