Re: Construction of Plant 6 Sewer Pump Station Mechanical Work

Honorable Board Members,

Bids were opened on 10/22/2020 for the above referenced project. This project will improve the air circulation and air quality at this pump station that also houses offices for the Town's pump station maintenance crew. Our engineers estimate for this work was \$90,000, however we received 6 bids as indicated on the attached. The lowest bid was from Everlasting Water Inc. DBA Camtech Mechanical and Plumbing. We do not have experience working with them; however we called several entities we work with that have worked with them and they gave us good references for Camtech. We also discussed the bid with Camtech and they are comfortable with their bid. While the work is over the engineers estimate for this project, having received 6 prices and discussing the project with the lowest bidder, we recommend award of this project to Everlasting Water, Inc. DBA Camtech Mechanical and Plumbing headquartered in Niagara Falls New York in the amount of \$118,500.

This work will be paid for with monies currently in reserve funding for sewer district 6.

Please contact me should you have any questions about this project.

Very truly yours,

Steven R. Tanner, P.E.
Town Engineer
